

Heat Stabilizer Pherst-TPP

Chemical name: Triphenyl Phosphite

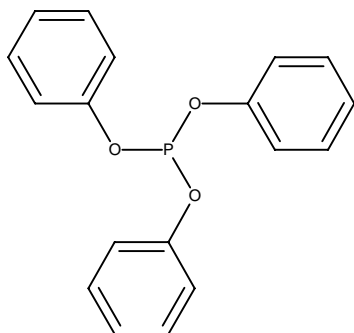

Equivalent: Weston TPP (Chemtura)

Molecular formula: C₁₈H₁₅O₃P

Molecular weight: 310

CAS No.: 101-02-0

Structural formula:

SPECIFICATIONS

Appearance: Colorless transparent liquid

Acid value (mg KOH/g): 0.5 max

Refractive index, @25 °C: 1.585 ~ 1.590

Density, @25 °C: 1.182 ~ 1.192

Freezing Point (°C): 19 ~ 24

APPLICATIONS

As assisting anti-oxidant suitable for PVC, PP, PS, polyester, ABS resin, epoxy resin etc. As chelating agent of PVC products; also used in rolling wrapping film, profiled bar and cables etc.

PACKING

225kg/drum
